

Colour to Life

You can be the Artist in this drawing and colouring adventure!

Created by Rommie Corso

Colour to Life

Stacks of creative pictures to colour in, plus idea pages to create your own works of art...

This book is designed to encourage children's natural ability to use their imagination through art. Depending on the individual development of the child, they can begin by curiously colouring in the pictures and as they develop, they can begin making their own drawings and ideas come to life.

This book can be used as a journal of pictures and may even provide insights to look back on later in life, to see how we thought, felt and perceived the world when we were youngsters. Suitable for all ages!
